Advanced A80 Super Yacht APSARAS to be officially presented at Cannes Yachting Festival 2015

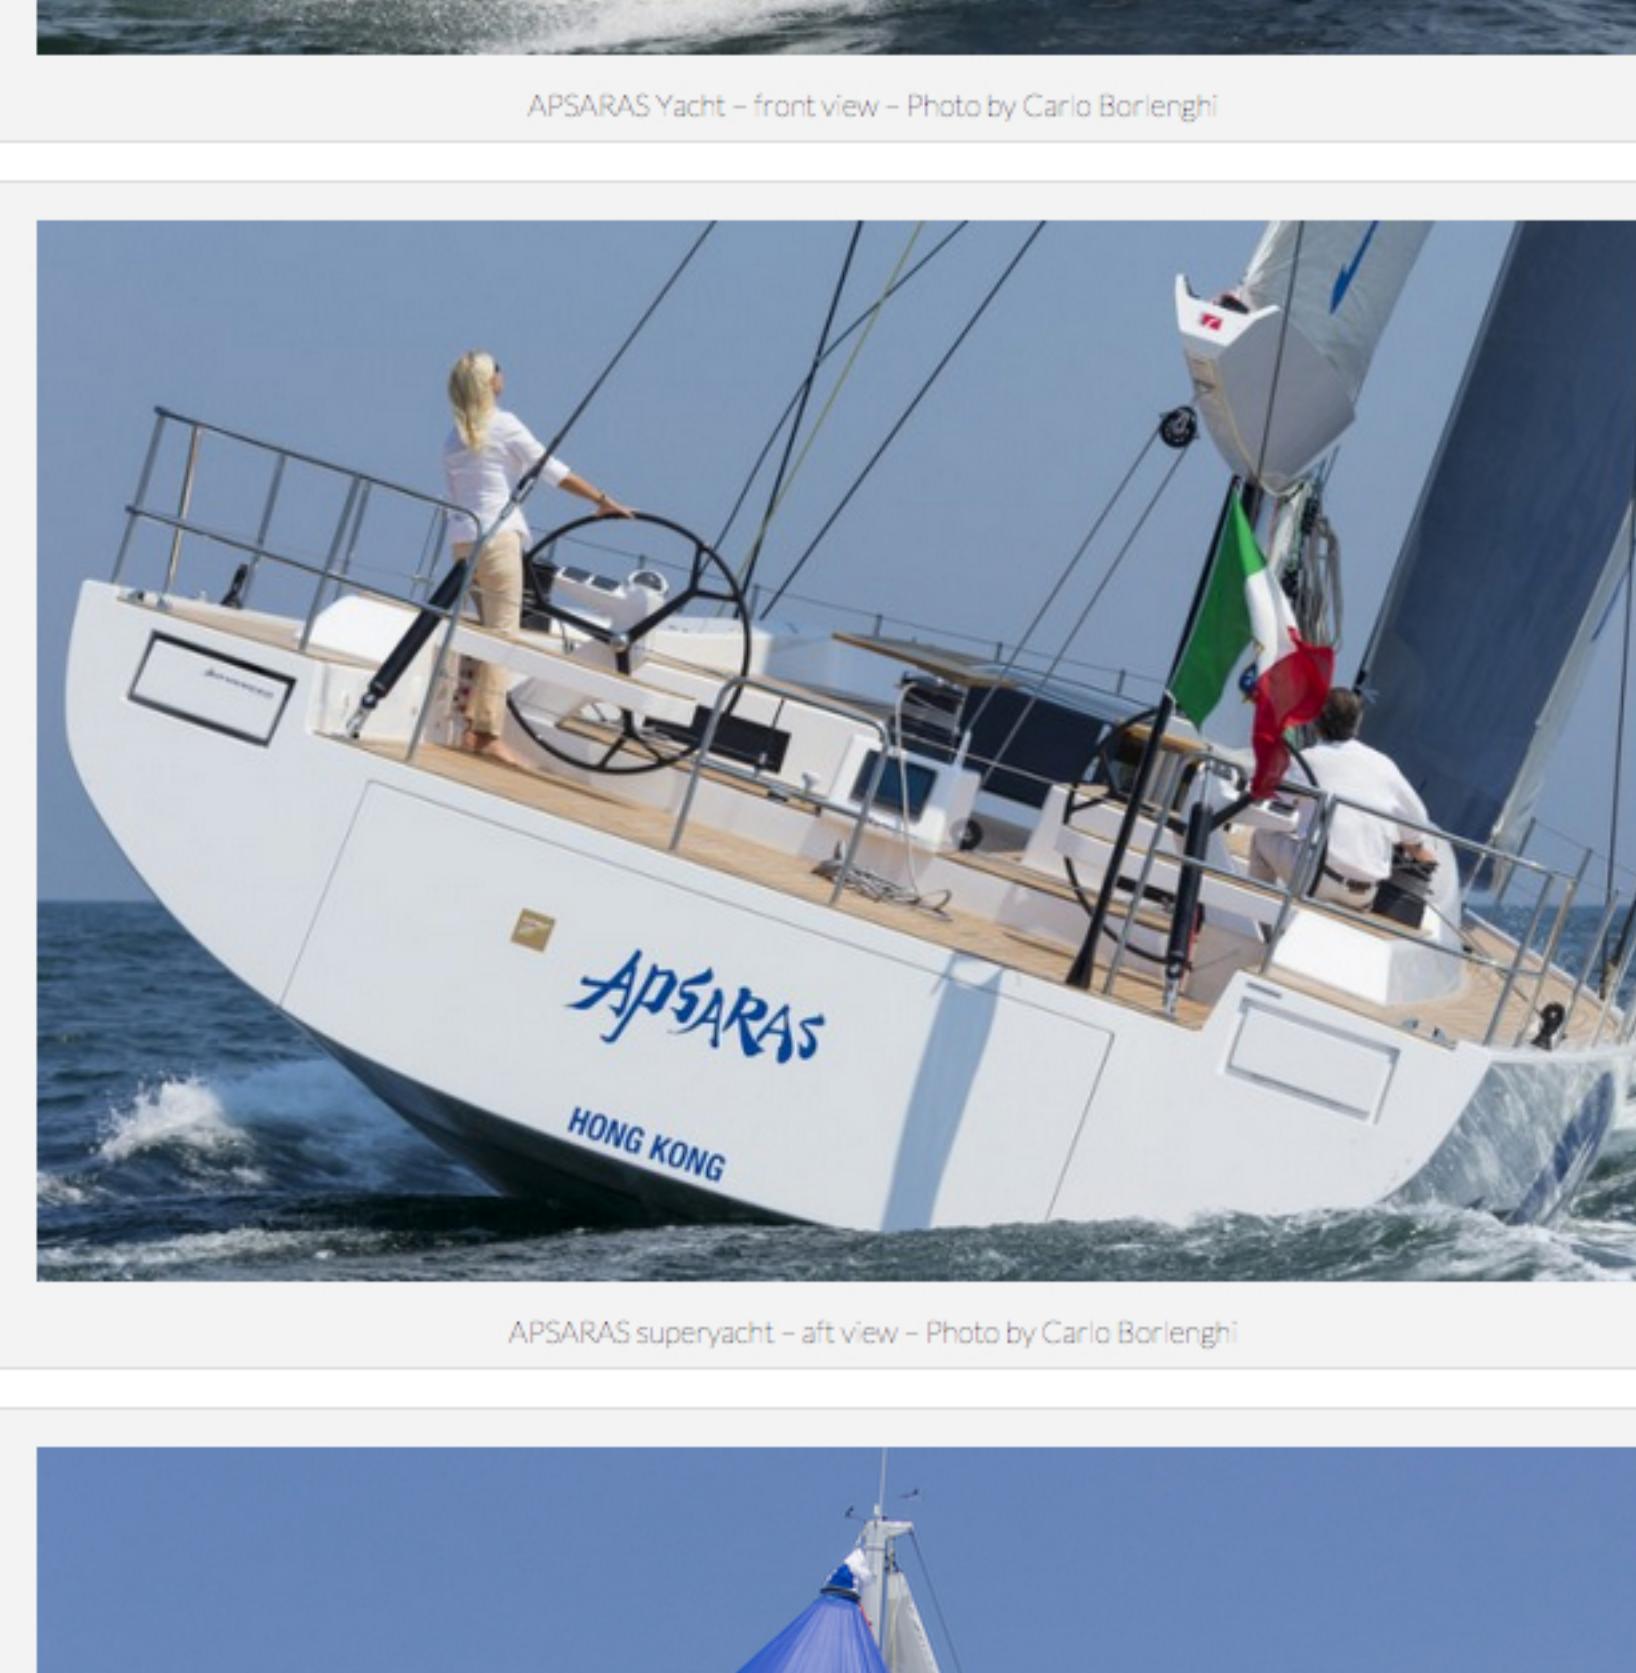

September 04, 2015

The Advanced A80 super yacht APSARAS will be officially presented by Advanced Italian Yachts at the next week's Cannes Yachting Festival. Luxury sailing yacht APSARAS is a true blue water thoroughbred, offering top quality and performance. She is the excellent result of the successful collaboration between the American naval architects John Reichel and Jim Pugh of Reichel/Pugh and the Italian yacht designers Mario Pedol and Massimo Gino of Nauta Yachts.

Easily handled in any weather condition, luxury yacht APSARAS can be characterized by comfort, elegance and excellent performance, as well as a complete integration between the inside and the outside, thanks to a glass window deck house, ensuring intense brightness, while enjoying an all-around view of the outside. Moreover, there is an oversize aft deck, hosting different areas: a dining cockpit with two sofas and extendable tables, a relaxation area close to the manoeuvring area, as well as a sunbathing area to the stern.

Accommodation aboard A80 superyacht APSARAS is provided in the full-beam owner's suite with a split bathroom, a centrally placed king-sized bed and two side sofas/peds. This flexible space can be easily divided to obtain two smaller cabins. Twin en suite guest cabins can be found midships. There is also a full-beam saloon full of natural light thanks to skylights and four large windows, offering fantastic sea views. There is also a large dining area port and a living area starboard, while a top class galley and comfortable crew quarters are positioned forward and feature a crew mess and two crew cabins.

The Advanced A80 yacht APSARAS boasts the most innovative and advanced construction materials and techniques. Sandwich panels with fibreglass and carbon reinforcements are impregnated with epoxy resins infused under vacuum and reinforced with unidirectional carbon fibre in high load areas. Furthermore, to increase hull stiffness and save weight in the upper hull, improving stability, it has been chosen a full carbon deck. Both hull and deck are made from female moulds for a very light, stiff hull with perfect surface finishing.
